

# Paid Leave Means A Stronger Maryland

JANUARY 2019

## Support HB 341/SB 500, "Time To Care Act of 2019"

The vast majority of working people in the United States do not have paid family leave through their jobs.<sup>1</sup> **In Maryland, even *unpaid* leave under the federal Family and Medical Leave Act is inaccessible for 56 percent of working people.**<sup>2</sup> This means Marylanders face impossible choices when new children are born or adopted and when serious personal or family health needs inevitably arise.

### Marylanders are caught between their work and family responsibilities.

People in  
Maryland  
both work  
and provide  
care

- ▶ In 76 percent of all Maryland households with children – more than 970,000 homes – all parents have paying jobs.<sup>3</sup>
- ▶ Women's wages support their households. In Maryland, 80 percent of Black mothers, 51 percent of Latina mothers and 50 percent of white mothers are key family breadwinners.<sup>4</sup>
- ▶ Women make up nearly half of Maryland's labor force (49 percent) and one-third of its business owners (33 percent).<sup>5</sup>
- ▶ Across the country, many men want to play a larger role in caring for their children,<sup>6</sup> but unsupportive policies and stigma hold them back.<sup>7</sup>

**Paid leave means not having to choose between job and family.**

### Maryland families will face increased family and medical care needs.

- ▶ Nearly one in four workers is age 55 and older.<sup>8</sup>
- ▶ In less than 15 years, the share of the state's population age 65 and older will grow by nearly 30 percent.<sup>9</sup>
- ▶ Older workers are more likely to experience serious medical conditions that require care.<sup>10</sup>
- ▶ Six people die every day from drug overdoses in Maryland.<sup>11</sup>

**Paid leave means older adults and working people of all ages**

The state's  
caregiving needs  
are significant,  
and growing

**can get the support they need to receive and provide critical care.**

**Impossible choices between job and family are hurting the economy, and women suffer most.**

**Maryland's  
economy and  
families are  
suffering**

- ▶ In Maryland, there is an 11-percentage point gap in labor force participation between men and women, in part because the United States lacks family friendly policies.<sup>12</sup>
- ▶ Nationally, if women participated in the U.S. labor force at the same rates as women in countries with paid leave, our economy would benefit from more than \$500 billion in additional economic activity each year.<sup>13</sup>

**Paid leave means people – especially women – aren't forced to leave the labor force to care for their families or health, reducing turnover for employers and boosting the economy.**

**Marylanders need a real policy solution to address the country's paid leave crisis.**

A true paid leave policy would:

- ▶ Be cost-effective for workers, employers and the government;
- ▶ Cover all working people, apply equally to men and women and reflect a modern definition of family;
- ▶ Include the well-established reasons people need family and medical leave;
- ▶ Provide at least 12 weeks of leave and replace a substantial share of workers' usual wages; and
- ▶ Protect workers against adverse consequences for taking leave.

**House Bill 341/Senate Bill 500** aligns with these criteria, and deserves support. And the sustainable fund it would create would reduce the number of working families in Maryland facing significant economic insecurity when they need to take family and medical leave by 85 percent.<sup>14</sup>

**Paid family and medical leave means a stronger economy, healthier families and businesses, greater equity regardless of a person's job and more workplace equality for women.**
